Advanced Optics Group Lunchtime Seminar “One-step biofunctionalisation of arbitrary substrates”

Stephen Henry

Auckland University of Technology

Kode™ Technology is a multi-functional nanotechnology paint that can modify virtually any biological surface in less than 30 minutes and any non-biological surface in a few seconds. It is the easiest, fastest, most versatile and controllable method for temporary modification of any surface.

1:00pm Monday 14th November 2016
Lecture Theatre B3, Life Sciences Building
All Welcome
